

Additional Course Delivery Information

In addition to the Driver CPC course suite (LGV), other courses will be made available from time to time.

In order to deliver these courses, consortium members must apply for the addition of the courses to their membership via the RTITB Driver CPC Consortium Membership Information Update form.

The addition of some courses will incur a fee and requirements to meet additional criteria.

Each course must be delivered in strict compliance with the conditions that apply to these courses. Those conditions include Instructor qualifications, training centre facilities, course delivery criteria and training centre approvals.

Only when RTITB has confirmed that all conditions can and are being met, will the consortium member have the course added to their membership and a new letter of membership dispatched.

Carriage of Dangerous Goods – Course Delivery Information (only deliverable to LGV licence holders)

Course outlines have been approved by the Joint Approvals Unit for Periodic Training (JAUPT) for Carriage of Dangerous Goods – Initial and Carriage of Dangerous Goods – Refresher training. Though there are a number of ADR courses approved by the Scottish Qualifications Authority (SQA), there are only two courses that have been approved by JAUPT for upload to DVSA. All other courses will be rejected. These courses can only be delivered by RTITB qualified instructors through SQA approved organisations who have also attended the RTITB Driver CPC Consortium Online Induction.
